Testing Stream

Mock Test Sample 3 Max Marks 25

1. A thermometer measures temperature in whole degrees only. If the temperature falls below 18 degrees, the heating is switched off. It is switched on again when the temperature reaches 21 degrees. What are the best values in degrees to cover all equivalence partitions?
a) 15,19 and 25.

b)17,18 and19.

c)18, 20 and22.

d)16, 26 and 32.

2 Which of the following statements describe why exploratory testing is a useful test design technique?

a. It can help derive test cases based on the internal structure of systems.

b. It is useful when there are limited specification documents available.

c. It is useful when there testing is constrained due to time pressures.

d. It is a cheaper alternative to more formal test design techniques.

A) b and c

B) a and c

C)b and d

D) c and d

3 Error guessing is best used:

a) after more formal techniques have been applied

b)as the first approach to deriving test cases

c)by inexperienced testers

d)after the system has gone live

4 Requirement 24.3. A 'Postage Assistant' will calculate the amount of postage due for letters and small packages up to 1 kilogram in weight. The inputs are: the type of item (letter, book or other package) and the weight in grams. Which of the following conform to the required contents of a test case?

a) Test 1: letter, 10 grams, postage €0.25. Test 2: book, 500 grams, postage €1.00. Test 3: package, 999 gram, postage €2.53

b) Test 1: letter, 10 grams to Belgium. Test 2: book 500 grams to USA. Test 3: package, 999 grams to South Africa

c) Test 1: letter 10 grams, Belgium, postage €0.25. Test 2: package 999 grams to South Africa, postage €2.53

d) Test the three types of item to post and three different weights

5 Which of the following is a form of functional testing?

A Boundary value analysis

B Usability testing

C Performance testing

D Security testing

6 In a Examination a candidate has to score minimum of 24 marks in order to clear the exam. The maximum that he can score is 40 marks. Identify the Valid Equivalance values if the student clears the exam.

A. 22,23,26

B. 21,39,40

C. 29,30,31

D. 0,15,22

7 Equivalence partitioning consists of various activities:

A Ensure that test cases test each input and output equivalence class at least once

B Identify all inputs and all outputs

C Identify equivalence classes for each input

D All of the above

8 An input field takes the year of birth between 1900 and 2004

The boundary values for testing this field are

a) 0,1900,2004,2005

b) 1900, 2004

c) 1899,1900,2004,2005

d) 1899, 1900, 1901,2003,2004,2005

9 Which of the following is true about White and Black Box Testing Technique:-

a) Equivalence partitioning, Decision Table and Control flow are White box Testing Techniques.

b)Equivalence partitioning, Boundary Value Analysis , Data Flow are Black Box Testing Techniques.

c) Equivalence partitioning , State Transition , Use Case Testing are black box Testing Techniques.

d) Equivalence Partitioning, State Transition, Use Case Testing and Decision Table are White Box Testing Techniques.

10 What is the important criterion in deciding what testing technique to use?

A How well you know a particular technique

B The objective of the test

C How appropriate the technique is for testing the application

D Whether there is a tool to support the technique

11 Tests are prioritized so that:

a) You shorten the time required for testing

b) You do the best testing in the time available

c) You do more effective testing

d) You find more faults

12)In which type of testing technique do we only check the boundary values and + or –of those values?

a)Equivalence Partitioning

b) Decision table testing

c) Boundary value analysis

d)Orthogonal array technique

13 What statement about expected outcomes is FALSE:

A)Expected outcomes are defined by the software's behaviour

B)Expected outcomes are derived from a specification, not from the code

c)Expected outcomes include outputs to a screen and changes to files and databases

d)Expected outcomes should be predicted before a test is run

14 Which of the following is not an aim of Cause –Effect Graphing

a) A graphical representation of inputs with their associated outputs used in designing test cases

b)Brainstorm session to find out the related causes and effects until we reach the goal

c)Tracking possibilities of incorrect assumptions of a particular event always happening before another

d)Producing non-redundant, high-yield tests

15 Non-availability of the applications can lead to

a)Exit criteria

b)Suspension criteria

c)Resumption criteria

d)None of the above

16 In prioritising what to test, the most important objective is to:

a)find as many faults as possible.

b)test high risk areas.

c)obtain good test coverage.

d) test whatever is easiest to test.

17 A test strategy defines

a)What is selected for testing

b)Objectives and results

c) It is a statement of the overall approach of testing to meet the business and test objectives.

d) Risk identification, mitigation, and contingency plan

18 Use cases can be performed to test

A Performance testing

b Unit testing

c Business scenarios

d Static testing

19 Stress testing is a measure of one of the following

a. Application response time
b. Concurrent load an application can handle
c.Transactions per minute that can be handled
d. Virtual load at which the system will fail

20 To ensure Requirements coverage, what technique do you suggest :

a. System Testing
b Reviews
c. Traceability matrix
d. none of the above

21 A system test that forces the software to fail in a variety of ways and verifies that software is able to continue execution without interruption. This definition in nearest to

a. Recovery testing
b. Stress testing
c. Both of the above
d. None

22 When I want to test the following scenario ie " Are the controls laid out in a logical sequence, from left to right and top to bottom(for most of the Applications) , " I am talking of

a. GUI testing
b. Compatibility testing
c. Usability testing
d. None of the above

23 How can it be known when to stop testing?

a) When no more bugs can be found

b) When the time allocated is over

c)When the quality goals set up for testing have been achieved

d) All of the above

24) A document that describes an input, action or event and an expected response, to determine if a feature of an application is working correctly is called a

a) Test Plan

b) Test case

c) Test script

d) review record

25) The Test data / Test bed should be created indicates

a)Exit criteria

b)Suspension criteria/Resumption criteria

c)Entry Criteria

d) None of the above
